- ISO 492 (2002)
- ISO 1132 (2001)
- ISO 199 (1997)

- Radial Clearance:

- ISO 5753 (1991)

- Dynamic Load Ratings and Rating Life:

- ISO 281 (2007)

TÜV Rheinland®

MTK+ PRODUCTION STANDARDS

The information contained in this information sheet is based on the experience and know-how of MTK+ BEARING FACTORY NV/SA in the development and manufacturing of ball and roller bearings. Our production range is respecting the international standard guideline. The performance of our products can be influenced by a series of factors, especially the specific use, handling, the specific application, the operational environment, possible external contamination, etc. For this reason, universally valid statements about the function of our products are not possible. The information given in this MTK+ general products information sheet represents general, non-binding guidelines. No warranty expressed or implied is given concerning the properties of the products or its suitability for any given application.

Please contact and consult the MTK+ BEARING FACTORY NV/SA engineering department to discuss application conditions and the performance criteria of the products before the product is used. It is the responsibility of the user to test the functional suitability of the products and to use it with the corresponding care.

Our products undergo continuous improvement. We therefore retain the right to change our product program, the products, and their manufacturing processes as well as all details of our products information sheets at any time and without warning. With the publication of this product information, all previous editions cease to be valid.

Any form of reproduction requires express prior written permission from MTK+ BEARING FACTORY NV/SA.
